Hi Joe,

Your data helps shape the future of public safety.

We're inviting your agency to participate in the 2025 Flock Impact Census, a nationwide effort to quantify real-world outcomes driven by Flock technology.

As agencies move toward data-driven reporting, this survey helps bridge the gap between anecdotal success stories and verified, aggregate national data that supports marketing, ROI reporting, and responsible policy advocacy.

The survey will remain open through April 7, 2026.

Why it matters to you:

- Access to aggregate impact data you can use in city council presentations, renewal conversations, and community education
- Support responsible legislative advocacy that protects agency access to LPR and modern safety tools
- Stronger, defensible return-on-investment reporting to reinforce your department's modernization efforts
- Contribution to a national dataset that strengthens the broader case for technology-enabled public safety

Your agency's statistics will be anonymized and reported only in aggregate. No individual agency results will be published, attributed, or shared publicly without your explicit permission.

👉 Complete the survey here:

2025 Flock Impact Census

Thank you for considering participation; Your insights directly support your agency and the broader public safety community.

If you have any questions, please contact our Research team at research@flocksafety.com.
