---

WARNING!
This email originated from outside of the Town of Bluffton's email system. DO NOT click any links or open any attachments unless you recognize the sender and know the content is safe.

Good afternoon,

Action items and notes from today's call are below, please let me know if you have any questions!

Owner	Action Item	Status	Due Date
Alex	Reach out to Bob Charles for the SSO setup & Gateway install	In Progress	1/10/2025
Chief	Identify resource to send ESRI layers	In Progress	1/14/2025
Edie	Send images to use for the community website & materials	In Progress	1/14/2024
Kelly	Send email to create users in FlockOS	Completed	1/7/2025

Integration	Notes	Status
Map Attachments	1/7 - Your agency can add map attachments at any time (no need to send files to Flock); we support PDFs, Word docs, images (jpg, png), or website links as locations that show as pins on the map. Examples include floor plans, links directly to a VMS, a link to instructions for a special event in the area, primary contacts for a school, etc. This link has the step-by-step instructions to add attachments: https://help.flocksafety.com/s/article/Map-Attachments. **Note: A Flock Admin user will need to add the Floor Plans permission for other Roles**	Completed
SSO	1/7 - First step is to identify the SSO admin for Flock engineers to work with and also decide whether OIDC and SAML is preferred. Alex will reach out to Bob Charles (rcharles@townofbluffton.com) to get this started (CC the Chief & Lt. Fazekas) **What Single Sign On (SSO) options do we offer at Flock?** OIDC based Azure AD /Active Directory/ Entra/ M365 OIDC based Okta (can be any Identity Provider (IdP)) SAML based using Auth0 (can be any Identity Provider (IdP))	Planned
ESRI Layers	1/7 - We can bring in your ESRI layers to give you more detail on your FlockOS map. We typically upload beats, city limits, and parcel layers for addresses, though we can upload more (ex: hunting zones, horse trails, etc). Two ways we can load your ESRI layers: you can send us a link to a publicly hosted ESRI feature server, or you can send us zipped shape files that we can host for you. The Chief will identify the resource to send the layers (this can often be someone from the GIS team)	Planned

Community Website & Marketing Materials	1/7 - A website where members of the community can sign up if they want to register or integrate their cameras. We have a template for the website, but you can provide images and/or logos to customize the website, add quotes, or we can use stock images. We can also provide marketing materials to help promote the website to the community like flyers, business cards, window decals, and digital materials (a virtual post you can put on Facebook/Twitter/Instagram). I will work with Edie to get the images (& quote, if desired) for the website To get started on setting up the website and marketing materials to promote the website, we will need the following information from your agency: • What would you like the website/program name to be? The default will be Bluffton PD Safe • What large image would you like to be utilized at the top of the website? • What badge/logo/patch you would like us to use in the top corner of the website and on the marketing materials? • Do you want to have registration, integration, and purchase options on the website? Or do you want to remove one or two of these options? • Is there a quote from your agency that you would like to include at the bottom of the website? Examples: https://refer.flocksafety.com/operation-plugged-in/ https://refer.flocksafety.com/scottsdale-safe/ https://refer.flocksafety.com/prosper-catch/ https://refer.flocksafety.com/bloomington-psc-integration/	Planned
Wing VMS w/ Gateway: (1) 128-Channel Box	1/7 - We will use a gateway to make the Digital Watchdog camera streams available in Flock since we do not directly integrate with the VMS system. Bob Charles is the IT contact, Alex will reach out to Bob Charles to get the camera info and the address to ship the gateway (CC the Chief & Lt. Fazekas)	Planned
Enable Flock User Logins	1/7 - Flock would like to have your Integrations Engineer have access to your Flock system during the period of your FlockOS implementation so that they can review how different integrations are appearing on the map. I sent an email for written confirmation, Chief approved	Completed

Meeting Attendees	Tuesday, January 7th **Attendees - Flock Safety** ☑ Kelly Baeza, *Technical Project Manager* ☑ Alex Menke, *Integrations Manager* ☑ Georgia Abdallah, *Customer Success Manager* ☑ [Shadowing] Courtney Wilson, *Technical Project Manager* ☑ [Shadowing] LaTonia Oyeniran, *Technical Project Manager* **Attendees - Bluffton PD - EST** ☑ Chief Joe Babkiewicz ☑ Lieutenant Ryan Fazekas ☑ Lieutenant Craig Karafa ☑ Edith Moody, *Community Relations Manager* ☑ Michelle ☐ John Destasio
Project	Project Tasks: high level overview and status of the project tasks

Materials	Google Drive: meeting notes and project documents saved here

Thanks,

Kelly Baeza
Technical Project Manager
