Sensitivity: Normal

We put one of our vehicles into a hit list and drove through each camera. We did receive an alert on each one of the cameras. We have not gotten a hit since then but I am assuming that no vehicles have come through with any reason for notifications.

Good Morning,

Checking in here - have you still not received any alerts from those newly installed cameras?

Best,
Georgia

Good Morning,

Of course - I changed the camera name for #13.

As for, #12, #17 and #08, I can see that they are all active and working properly. Have everyone double check which devices they have selected to get alerted on from the Alerts page. Let me know if those cameras are already selected.

If the user selected individual devices, when new ones get installed, they'll have to select those new cameras as well.

As an admin, you can also now create Zones for your department. The benefit of doing this is that you as an admin can add new cameras to the zones and users who have that zone selected will automatically get alerts off those new cameras without having to adjust the devices they've selected from the Devices & Zones section.

Feel free to schedule a screenshare call with me if you want to go over this together.

Thanks,
Georgia
