Subject: Live Video is Now Available in the Mobile App - Flock Safety
Sensitivity: Normal

WARNING!
This email originated from outside of the Town of Bluffton's email system. DO NOT click any links or open any attachments unless you recognize the sender and know the content is safe.

Good Afternoon,

I'm reaching out to share a quick update regarding our mobile app. Organizations with **live video/VMS** can now watch live streams directly through the mobile app. Watch a quick tutorial here.

- Streams can be accessed by their location, alphabetically or by networks so users can quickly find the live stream they need.
- Specific Streams can also be **pinned** for quick access. Easily switch streams within a network with a tap of a button.
- Video can be watched in both **Portrait, Landscape** and **Picture-in-Picture.** PiP, allows for the individual to keep eyes on the stream while navigation through Flock Safety Mobile app or other apps on their phone.

NOTE: Today we do not support **Recorded Video** or **PTZ control.**
You need to be on **iOS** **1.33** and **Android** **1.39.**

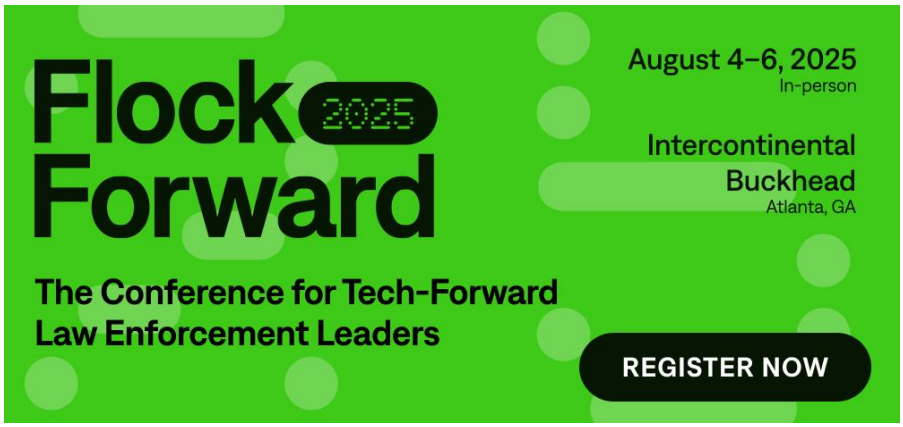

Please let me know if you have any questions.

Thanks,
Georgia
